

Build-chain smoke document

docs pipeline (issue #33)

2026-08-11

Purpose

This document exists only to prove the MD -> LaTeX -> PDF chain end to end: YAML metadata, section headings, inline math $e^{i\pi} + 1 = 0$, display math with explicit tags, footnotes,¹ and a table.

Math

$$\Gamma^\sigma{}_{\rho\nu} = \frac{1}{2} g^{\sigma\lambda} (\partial_\rho g_{\lambda\nu} + \partial_\nu g_{\lambda\rho} - \partial_\lambda g_{\rho\nu}). \quad (1)$$

Table

Chain step	Tool
MD -> LaTeX	pandoc
LaTeX -> PDF	xelatex

¹A pandoc footnote, rendered by LaTeX.
